**DETAILED ACTION**

***Response to Amendment***

1. Receipt is acknowledged of the Amendment After Final filed January 28, 2004.

***Allowable Subject Matter***

2. Claims 1-19 are allowed.

The following is an examiner's statement of reasons for allowance: none of the cited prior art of the references (Suzuki (U.S. Patent 6,072,916); Yamamoto (U.S. Patent 5,936,709); Nishida (U.S. Patent 5,886,774)), taken alone or in combination of other references, discloses, teaches or fairly suggests a database storing the inputted original identifying information in relation to the image file as recited in claims 1 and 9. Yamamoto reference discloses a first and second memory that store an order number for prints to be collated with an order number for an index print. However, the recited limitation of an image file being stored to a database in relation to original identifying information is not disclosed in the reference. Furthermore, the collating means of Yamamoto collates the bar code information printed on an index print with the bar code information on a DP bag. The barcode information is not stored in relation to the image data. The dependent claims 2-8 and 10-19 are allowed since independent claims 1 and 9 are allowed. Accordingly, one of ordinary skill in the art would not have been motivated to modify teachings of prior arts to meet the claimed limitations as set forth in the present claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
